

Raiyan Mirza

Toronto, ON | +1 (437) 655-6844 | raiyan.mirza1233@gmail.com | [Portfolio](#) | [Github](#)

Education

Toronto Metropolitan University | Toronto, ON

Bachelor of Science in Computer Science, Honours | Expected Graduation: April 2028

Extracurricular: I'm involved with the TMU Taekwondo Club, where I train regularly and support club activities, and I also volunteer with the TMU MSA by helping with Jumma prayer and the Marhaba Dinner.

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, C, C++, Rust, SQL, HTML, CSS, Bash

Frameworks & Libraries: Tauri, Svelte, React, TensorFlow/Keras, OpenCV, MediaPipe, Java Swing, Tailwind CSS, Node.js

Tools & Platforms: Git, GitHub, SQLite, Vite, Chrome Extension APIs (Manifest V3), OpenAI & Gemini APIs, ESLint, Vitest

Concepts: Object-Oriented Programming (OOP), Data Structures, Machine Learning, Computer Vision, REST APIs, Desktop App Development

Projects

Lexiq — Offline-First Language Learning App

- Built a cross-platform desktop app (**Tauri 2** Rust host + **Svelte 5**/TypeScript, SQLite) for learning French with spaced-repetition review (FSRS) and six exercise types — feature-complete for A1–A2 with 32 units, 407 words, and 525 exercises, running fully offline with no account required.

SentinAI — AI Legal Risk Scanner (Chrome Extension)

- Built a Manifest V3 Chrome extension that audits Terms of Service and Privacy Policies in real time using **GPT-4o-mini**, visually highlighting risky clauses directly on the page; built for a TELUS-sponsored hackathon.

Sign Language Interpreter

- Built a real-time sign language interpreter using **MediaPipe** for hand/pose tracking and an **LSTM** (TensorFlow/Keras) model to classify gesture sequences into text, with a custom Tkinter GUI for live use and data collection.

StudyAI — AI Quiz Generator

- Built a web app using **Google Gemini** to turn notes, PDFs, and images into interactive quizzes, with adjustable question counts, local history tracking, and PDF export of results.

Medical Management Pro

- Built a **Java Swing** patient/appointment management system with a Python-Matplotlib analytics bridge (Java–Python IPC via ProcessBuilder) for real-time demographic visualizations; built for TMU's CPS209 course.

Eshock.it.com | Lilongwe, Malawi — Junior Developer | 2019-2021

- Developed and deployed custom e-commerce modules** to enhance platform functionality and improve user experience for digital retail solutions.
- Architected technical solutions** for complex business problems, focusing on system scalability and efficient data handling.
- Managed end-to-end project lifecycles**, ensuring development milestones were met and technical requirements aligned with business goals.
- Assisted in the daily maintenance and optimization of complex systems**, reducing downtime through proactive debugging and system monitoring.

Department of Civil Aviation (Malawi Airport) | Lilongwe, Malawi — Technical Assistant

- Coordinated the technical installation of CCTV security systems** and TV displays throughout the terminal to ensure 24/7 operational surveillance.
- Configured and maintained flight information display systems (FIDS)**, ensuring the accurate, real-time relay of critical flight data to passengers.
- Collaborated with engineering teams** to troubleshoot hardware-software integration issues within high-security airport infrastructure.
